Volterra Advisors

CAPACITY NETWORK

For owners, developers and operators

Have capacity or powered land? See the asks first.

Volterra posts real requirements from the data center developers, operators and AI companies it represents, never by name. Answer one in about two minutes. Join the network, and the next ask that fits your site reaches you 24 hours before it goes public.

HOW IT WORKS FOR YOU

01 **Answer an ask.** One page, one form, nonconfidential. Answering is free.

02 **Hear back either way.** Every answer is reviewed, and we update you whether or not your site moves forward.

03 **Send documents only if asked.** On a private follow-up page. A client sees a file only with your OK, and Volterra does not certify it.

04 **Introductions on your terms.** Allow sharing when you answer, and the client sees your name and contact details from the start. Otherwise they go over only when you agree to meet.

WHAT MEMBERS GET

First look. Asks that fit your size, market and timing, by email, a day before anyone else.

The readout. A short note on what each search drew, in counts, no names.

What we ask: keep your capacity profile current. Unsubscribe any time.

RECENT ASKS

Air-cooled capacity for AI training	2–4 MW	Open internationally	**Closes 25 Nov**
AI colocation sites, built or within a 1–2 year build	20–40 MW	Any market	Closed

Current asks, with their deadlines, are listed at volterraadvisors.com/call-for-sites.

NOT A FIT FOR THIS ASK? WE ALSO WORK FOR OWNERS

Powered land sales. We represent owners selling or leasing land with power.

Power Queue Sherpa. One point of contact between you and the utility, start to finish.

Power Queue Decision Package. Whether entering the utility queue makes sense for your site.

Site screens. A short read on what your site could support and who would want it.
